Gardenia 1691

San Juan, Puerto Rico

Honor Award of Excellence
Renovations & Additions

Díaz Paunetto Arquitectos
San Juan, Puerto Rico

A steel sculptural installation redefines the main façade of this residential renovation. Gardenia 1691 disperses the afternoon sun and creates multifaceted light and shadow throughout the space. Initially crafted by hand, the designers used parametric programming technology and laser cutting to build the sculpture. The jury commended the stunning results achieved through a complex process.
